# Armand Navarre

## Contact Information

Armand Navarre

+33 6 58 29 18 00

armand.nvre@gmail.com

38 000 Grenoble, France

## Hard skills :

- IC design: Cadence Virtuoso, LTspice
- PCB design: KiCad
- Digital design: SystemVerilog, Synopsys Design Compiler, Cadence Innovus, Vivado
- Programming: C, Python

## Languages :

- French, native language
- English, TOEIC 910 (B2+), 2025
  Cambridge (B2), 2022

## Driver's license - 2022

## Soft skills

- Rigor and attention to detail
- Team Spirit
- Adaptability & quick learning

## PORTFOLIO

armand-navarre.github.io

## PERSONAL STATEMENT

Engineering student eager to thrive in a fast-paced environment and contribute to current technological challenges. My latest project: a 32-tap symmetric low-pass FIR filter in an ADC → FSM → DAC chain, from SystemVerilog RTL to synthesis (Synopsys) and place-and-route (Cadence Innovus). I am seeking a 3/4 month internship in digital IC design, also open to mixed-signal or analog projects, to apply and further develop these skills within a driven, collaborative R&D team.

## EDUCATION

### Second year in Engineering School (MSc level)

Polytechnical Institute - PHELMA, Grenoble, France

Integrated Electronic Systems

- Analog & mixed-signal IC design, CMOS technology, microelectronics
- Signal processing, RF and telecommunication systems
- Embedded systems, digital design (SystemVerilog), microcontrollers

### Bachelor of Technology in Physical Measurement & Instrumentation

University Institute of Technology (IUT), Blois, France, 2022-2025

- Advanced instrumentation techniques ; design and control of measurement chains (Arduino, ESP32)
- Electronic systems & microcontrollers ; PCB design, analog and digital signal processing
- Metrology & data processing ; deployment of measurement and data analysis methods

## EXPERIENCES

### Rocket Engine Test Bench Analyst Technician - Internship

ArianeGroup, Vernon, France, 2025 (14 weeks)

- Developed a measurement adequacy tool for engine test benches
- Verified sensor behavior : wiring, power supply, digital filtering, LF/HF measurements

### Undergraduate Research Internship

ETLA, University of Helsinki, Finland, 2024

- Acoustic analysis of ultrasound signals
- Micro-structural analysis using Fiji (ImageJ)
- Co-author of a peer-reviewed scientific article published in English - “Ultrasound-assisted fabrication of 3D poly (ε-caprolactone) scaffolds with tunable porosity”

### Weekend Startup - France

Blois, France, 2023

- Pitch of an innovative idea
  Solar panel with thermal energy recovery
- Best Prototype Award

## INTERESTS

- Sports : Volleyball (University team), Badminton
- Technology : Emerging technologies, Audiovisual systems
- Aerospace : Space exploration and aeronautics
